But Susan, R2 needs to brief Ren and perhaps Dale on this asap, and make sure this is agreed as part of the eagle game plan.

Hi Susan,

Yes we can shift the \$ for Ponderosa Pine to work on the eagle petition finding. Bruce, would you make the change in the spreadsheet.

Thanks,

Adam

see below--It looks like we may have used some left over \$ in fy05 to do a bit of work on it. Not much as been done. In fy06 I believe Marj said we could use the Ponderosa Pine \$ but just wanted to check on it and have something in writing, preferably in the allocation spreadsheet to confirm. Thanks!!!

You probably received this, but if not here's my comments.

Hi Marj, in follow up to our discussion this morning here's a list of changes/comments on the fy06 allocation.

- (1) The 12-mo finding for the karst spider (Cicurina cueva) is not included on the list.
- (2) The figure for the roundtail and headwater chubs 12-mo is \$65,430 and the Mx garter snake 12-mo is \$83,605 (the difference may be due to funding already received in fy 05 but we just weren't sure why they are different since we have the same bio day rate).
- (3) No need to fund the Ponderosa Pine 90-day since we've addressed that with a letter (the petitioned action did not qualify as a listable entity).
- (4) From previous emails it appears that we were going to use funds left over from the Gentry's indigo bush to start to the bald eagle 90-day finding work in fy05. I'm not sure how much work was done last year and if funding was used from the Gentry's. I'll follow up on that but I'm assuming we'll need additional funds this year to address the 90-day uplisting petition.
- (5) The \$11,600 left over in 1117 from fy 05 will be used this year for spikedace and loach minnow. Not sure if you need to deduct that from this years total for the fchd for those species.

We'll follow up with you on the Pecos sunflower due to the Ps rejecting our dates after we get new dates

from the FO.

Thanks, sj
