

ITCA WIC ALERT

Volume 9, Issue 1

April 2011

Quarts of Milk

The ITCA WIC Program has been receiving numerous complaints from our clients that stores do not have the quart size of milk available.

All stores are required to carry quarts of milk in whole and 1% or skim as per the minimum stock requirements in your Vendor Contract.

Below are the minimum stock requirements for quarts of milk:

Brand/Type: Lowest cost brand of refrigerated milk

Quantities required to stock at all times: 4 quarts

Varieties: Must carry whole and 1% or skim

If you are having difficulty in receiving the quarts of milk from a distributor, please use an alternate distributor. If you continue to have difficulties, please contact Crystalina Corona, Vendor Coordinator, at 602-258-4822 or by email at crystalina.corona@itcaonline.com.
