Course Description: This dynamic proprietary 4-day (32 hours) comprehensive course, begins with lecture and provides the students with the skill-set necessary to properly identify and apprehend smuggling operators in transit. The students will learn about the specific components involved in counter-smuggling/interdiction enforcement missions. This curriculum, having been designed by the instructor and based on his personal experience in investigating smugglers, begins with helping the student understand their own strengths, while providing solutions to improve their weaknesses in interview situations. The course continues into understanding the Smuggling Operations and the “Tradecraft” used in these Clandestine Operations. Utilizing the Evading Honesty system (a cross-cultural/cross-gender system) developed by the instructor, the students are taught to formulate questions in a manner that is non-coercive and non-confrontational to gain intelligence needed to establish reasonable suspicion for detention and search. Upon completion of the course, the students will have learned about “Target Selection” process, “Rapid Behavioral/Statement Analysis Techniques”, and proper documentation of observed anomalies in a case report. The learning experience is enhanced by being exposed to numerous “Real Life” case-study videos (made by the instructor himself), in which the skill-set is applied with positive results.
