

Inter Tribal Council of Arizona, Inc. WIC Program Breast Pump Decision Tree Tool

1. Multi-user and single-user breast pumps may only be issued to exclusively BF clients.
2. Manual breast pumps can be distributed to any breastfeeding client.
3. Assess need for pump; don't assume client needs a pump.
4. Medical need is a higher priority than work/school.

NOTE: It is best to provide pumps 1-2 weeks before work/school starts.
