Subject 90-day petition finding for Sonoran Desert bald eagle
population

Jim,

We have incorporated and address all of comments submitted by Ben Jesup on August 7, 2006. I will be sending you 2 versions of the finding on the next shuttle. One version will show the "track changes" and will only include the pages on which edits were made. The other is a clean copy of the finding (it its entirety) with all edits accepted. Please let me know if you have any questions upon receipt of the document.
