Subject Fw: significance argument

FYI - I called Sarah last night before I left the office. She said that the FO put everything they have in the table. Besides the information the petitioner provided, they don't seem to have any additional information to provide that will assist with the significance discussion.

Subject significance argument

Please see the attached table outlining the petitioner's points concerning significance. I'm assuming, based on yesterday's call, that ya'll will be working on this portion of the finding and that we will be working on the discreteness portion. Mary is currently actively working on the discreteness analysis and I am dealing with comments on the rest of the finding from Janet and Spangle. Let me know if my assumptions are incorrect or you need to talk about any portions of the analysis. Thanks and have fun!

Also, the finding was signed by Ben on Monday and sent out Fed-X yesterday. Let me know if you don't receive the package today.
