Subject Re: Fw: 90-day finding on petition to list Sonoran Desert bald eagle population will publish in FR on Wednesday, August 30th 

Steve:

I have skimmed this, and it remained the same: positive on discreteness, negative on significance, and negative on threats being substantial enough to raise the population to endangered status. I already passed this on to Game and Fish and Mary Jo Stegman. They had commented on previous versions, and seen the bulk of it already.

Thanks,
Mary

Subject Fw: 90-day finding on petition to list Sonoran Desert bald eagle population will publish in FR on Wednesday, August 30th

Any changes I should be aware of? Last I saw it was positive on discreteness, negative on significance, and negative on threats. Also, when can we share this with G&F?.....SLS.
