Subject 90day finding on bald eagle SW DPS

Hi Susan,

I took a look at the advanced read copy of the bald eagle 90day finding. I had a few general comments that I'd like to provide -

(1) No citations are provided in the threats analysis section of the finding. If the petitioner provided citations for their statements we should probably reference them as well. Especially if we are not refuting the information.

Let me know what you think.

Also, yesterday I discussed the briefing paper and the advanced read version of the finding with Doug. I mentioned that R2 wanted to send the bp forward and see how it was received by AES. He wanted to take a quick look at statement and the advanced read today and then get back to me. I'll let you know what he says.
