

Resources and Tips for Working with American Indians and Alaskan Natives

How to Use Resources & Tips

Resources & Tips guides public health nutrition professionals to programs and resources for the American Indian and Alaskan Native (AI/AN) populations.

What you will find

On the first three pages, you'll find background, history, insight, cultural considerations and some general information about AI/AN, populations and their foods. These are followed by 9 categories of specific resources.

- Cultural Competency Trainings & References
- Reviews of Health Projects with American Indians
- Seeds, Gardening, Ethnobotany, Agriculture Products
- Specific Tribal or Regional Resources
- Consumer Resources
- Professional Resources
- Higher Education Resources
- Museums with American Indian Resources
- Key partners

Target Population: American Indian and Alaskan Native nutritionists and others who provide nutrition education in AI/AN communities.

Background: Over generations and through many cultures, the collection, cultivation and preparation of native foods supported populations throughout the hemisphere. These foods, five featured in the lovely Crops of the Americas* postal stamps and four in the Fruit Berries** shown on these pages, continue to flavor traditional and new recipes throughout the world. Evolving and tasty, these foods symbolize the heritage and wisdom of a region and offer color and flavor as well as nutrition. Corn became a staple food for millions and beans added still another rich plant protein to human diets. The squash, melons, chili peppers and sunflowers harvested and eaten throughout the world illustrate the culinary bounty provided to others by AI/AN. In the Resource Section of this document, are references to the trends that support sustainable agriculture, strong local economies and connections between growers, consumers and healthy foods. The heritage and traditions of American Indians offer much to those who recognize that food is more than nutrition; that food is part of the system that supports both individual and community life.

* Illustrations are from the "Crops of the Americas" United States postage stamps, issued in 2006, illustrated by artist Steve Buchanan. ** Fruit Berries Definitive Stamp designed by Howard Paine and illustrated by Ned Seidler and issued in 1999. See the consumer resource section for ordering stamps and related educational materials available from the United States Postal Service.

General Suggestions: This document has a variety of resources to learn more about particular regions and their traditional foods. Most American Indians and Native Alaskans are the experts in their own history and traditions and understand information in the context of their culture. People want to see a member of their own community. A knowledgeable and respected AI/AN person will be able to navigate the details of vocabulary and eating variables. Would anyone risk a new food taste recommended by a stranger? A person familiar with the place and time and age group may recognize the realities related to food choices. Lack of a reliable, safe water supply and easy access to soda pop is not really a fair choice, but it may be a reality unknown to a stranger. Costs and availability may be related to choices in the past that have become habits of today or they may remain significant concerns that would not be shared with a stranger. These resources showcase positive images and inspirational stories. There is no excuse for nutrition education materials that use hurtful stereotypes, when people from cultures that value dignity and beauty have already produced respectful materials.

History: Grounded in international law and the United States Constitution, tribal sovereignty is the principle that AI/AN's have inherent rights to be governed by their own laws - to the exclusion of state and local but not federal authority. It extends to some off-reservation rights such as hunting, fishing and gathering. (1) Rickert, Eve, "Raising the bar for lawyers" *High Country News*, Vol 39, No 17, p 10, September 17, 2007.

Traditional Indian health care practices and the western-model Indian health care system exist within a complex legal and historical framework. Basic principles of federal Indian law include: (1) tribes retain all of their inherent sovereignty that the federal government has not encroached upon; (2) the federal government, and not states, is in charge of Indian affairs; (3) the federal government only deals with tribal organizations or governments that it has recognized ; and (4) the United States has assumed a trust responsibility towards Indian nations resulting from treaty language and the role it has assumed with respect to limiting tribal sovereignty. This "trust responsibility" is the obligation to provide healthcare to American Indian and Alaskan Natives. It underlies the activities of the Indian Health Service and the system of hospitals, clinics, field stations and other programs. The legal and historical background of the current system reflects pendulum shifts between U.S. policy preferences for assimilation or for self-determination of Indian people. (2) Shelton, Brett Lee, *Legal and Historical Roots of Health Care for American Indians and Alaska Natives in the United States*, an Issue Brief for the Henry J. Kaiser Family Foundation, pps 1 - 5, February, 2004. Website with document www.kff.org

There are about 4.3 million people or 1.5% of the total U.S. population, who identify themselves as American Indian or Alaskan Native. Less than 10% of all American Indian tribal groups are 65 and older. About 1/3 of American Indians and Alaskan Natives are under 18 years old. (3) *We the People: American Indians and Alaskan Natives in the United States, Census 2000*, US Census Bureau, issued February, 2006.

There are over 565 federally recognized tribes and more than 100 state recognized tribes. There are also tribes that are not state or federally recognized. Approximately 36% of the population eligible for Indian Health Services live outside of areas where this delivery system is available. Studies on the urban American Indian and Alaska Native population document poor health and limited health care options. (4) American Indian/Alaska Native Profile, The Office of Minority Health, U.S. Department of Health and Human Services <http://www.omhrc.gov/templates/browse.aspx?lvl=2&lvlID=53> accessed October 23, 2007.

A regularly updated list of federally recognized tribes is at http://www.usa.gov/Government/Tribal_Sites/index.shtml. The March 22, 2007 *Federal Register*, Part V, Department of Interior, Bureau of Indian Affairs has the latest published list.

Safe and adequate water supply and waste disposal facilities are lacking in approximately 12% of American Indian and Alaska Native homes, compared to 1% of the homes for the U.S. general population (5) *Facts on Indian Health Disparities*, Indian Health Service, January, 2006 (website: <http://info.ihs.gov/Files/DisparitiesFacts-Jan2006.pdf>). This shockingly sad statistic contributes to the considerations of growing, safely preparing and preserving fruits and vegetables.

Native Americans have contributed significantly to the knowledge base about underlying biological issues for both diabetes and heart disease. Public health personnel as well as clinicians throughout the world benefit from this research. The Resource Section of this document has references to several important prospective epidemiological health studies from which priceless data may emerge for the obesity, diabetes and cardiovascular diseases which are now increasing rapidly throughout the world. A thorough review of literature related to obesity prevalence, consequences, contributing factors, intervention, and directions for future research has been recently published and is available on-line. (6) *Obesity and American Indians/Alaskan Natives*, prepared by Peggy Halpern, Ph.D, U.S. Department of Health and Human Services, April, 2007, <http://aspe.hhs.gov/hsp/07/AI-AN-obesity>.

American Indians have the highest per capita military participation rate, compared to any other major racial or ethnic group. (7) Huyers, Kimberly. "Socioeconomic Achievement

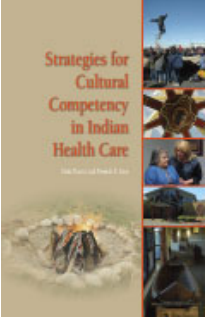

Outcomes and Veteran Status: Variations Among American Indians, African Americans and non-Hispanic Whites" Paper presented at the annual meeting of American Sociological Association, Montreal Convention Center, Montréal, Quebec, Canada, Aug 11, 2006.

http://www.allacademic.com/meta/p103768_index.html Opportunities to honor veterans are important occasions. Healthy food, including traditional crops and ceremonial foods, may be at these events.

Rev 9.18.08

RESOURCES SECTION

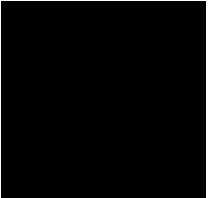

Cultural Competency Trainings

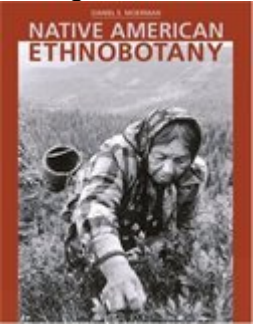

RESOURCE	DESCRIPTION	WEBSITE/SOURCE
Cultural Competency Training	Tailored training by tribal members of 1 – 2 days on topics such as “Working Effectively with American Indians”, “Historical, Legal and Political Perspectives”, “Historical Trauma Response and Intergenerational Trauma” and “Protocols for Working With Tribes”	Pamela E. Iron, M Ed. Executive Director National Indian Women’s Health Resource Center 228 S. Muskogee Avenue Tahlequah, OK 74464 Toll Free: 1 (866) 4NIWHRC (918) 456-6094 Fax: (918) 456-8128 Email: peiron@niwhrc.org
Book: <i>Strategies for Cultural Competency in Indian Health Care</i> , Mim Dixon and Pamela E. Iron, American Public Health Association, 2006 	This book and its accompanying CD provide an excellent overview of the importance of cultural training for both Native and non-Native providers. It is written from a Native perspective and is highly recommended for anyone working with Native people or who just wants a better understanding of cultural competency. Quote from website http://www.medscape.com/viewarticle/54268 0_print review by Patricia D. Mail, PhD, MPH	ISBN 0-87553-070-2 softcover, \$26.95 Published by American Public Health Association available at http://www.apha.org/publications/bookstore Click the shopping cart icon, then select the APHA catalog; the picture of the book is on the cover of the 2008 – 2009 catalog. 	the option of contracting for services instead of IHS direct services. More than 50% of appropriated budget is now allocated to tribally managed programs through contracts. Includes extensive list of IHS professional contacts and resources divided by the 12 service areas around the country and resource for photos that can be used in presentations; no photos of food preparation or agriculture currently cataloged.	
Literature Reviews of Health Related Projects with American Indians		
RESOURCE	DESCRIPTION	WEBSITE/SOURCE
Pathways <u>Curriculum Materials</u> 	Pathways was an obesity prevention study on American Indian children in grades 3 – 5. It has parental involvement activities, physical education, and a food service program. Pathways developed the program to be appropriate and appealing to American Indian children. The materials are very user-friendly and may be modified for use by other communities in addition to American Indian communities. Tips for classroom management particularly practical and positive! Check the website to learn more about the symbols in the project logo!	The materials are described in detail and can be downloaded from the University of New Mexico Web site http://hsc.unm.edu/pathways/ Contact: Dr. Sally Davis, Director/Principal Investigator UNM/CHPDP/Pathways MSC 11 6145 1 University of New Mexico Albuquerque, New Mexico 87131 505-272-4462 smdavis@unm.edu
Diabetes Prevention Program (DPP)	The Diabetes Prevention Program was a 27 center randomized clinical trial that studied more than 3,200 adults at increased risk of type 2 diabetes; 5% of participants were American Indian. Results showed that lifestyle changes reduced the risk of development of Type 2 diabetes by 58% and was effective for all ages and ethnic groups. Study done on those 25 years and older, but results indicate prevention with healthy diet and physical activity needed for youth.	Knowler, WC, Barrett-Connor E, Fowler SE, et al, "Reduction in the incidence of type 2 diabetes with lifestyle intervention or metformin" <i>N Engl J Med</i> 2002 Feb 7; 346 (6):393-403 Click on the map nearest an area of service at http://www.cdc.gov/diabetes/states/index.htm Find additional materials from 59 state and territorial Diabetes Prevention and Control Programs (DPCPs) with commitments to improve health and quality of life for all people with diabetes.

<p>Strong Heart Study</p> 	<p>Study of cardiovascular disease and its risk factors among American Indian men and women, since 1988. Study includes three major geographic areas and about 4,500 participants. Study has had several phases, most recently focused on genetic epidemiology to investigate the heritability of CVD and localize genes that contribute to CVD risk.</p> <p>Descriptions of this study are very technical and not directly helpful for developing patient education materials.</p>	<p>http://strongheart.ouhsc.edu/</p> <p>Center for American Indian Health Research College of Public Health University of Oklahoma Health Sciences center P.O. Box 26901 Oklahoma City, OK 73190-0901 (405) 271-3090 Toll Free 1-888-231-4671</p>
<p>Genetics of Coronary Artery Disease in Alaskan Natives (GOCADAN) Study</p> 	<p>Longitudinal, population-based study to investigate genetic determinants of cardiovascular disease and risk factors in Alaskan Natives. This study provided extensive information about dietary intakes of a population different from non-natives, including 6 times more fish intake.</p>	<p>https://www.sfbr.org/gocadan.secure/index.html</p> <p>The website has practical information which promotes traditional foods with a comparison to non-native foods, such as the value of willow shoots compared to iceberg lettuce. Look under “Resources for Our Community”. This website also has a clear and accurate primer on genetics, an interesting concept, often difficult to explain.</p>
<p>Seeds, Gardening, Ethnobotany, Agricultural Products Resources</p>		
<p>RESOURCE</p>	<p>DESCRIPTION</p>	<p>WEBSITE/SOURCE</p>
<p>This is a seed catalog which includes a growing calendar and history of agriculture among tribes of the Greater Southwest.</p> <p>Published and on-line newsletter with topics related to edible plants of the Southwest.</p>	<p>The Native Seeds/SEARCH conserves, distributes and documents the adapted and diverse varieties of agriculture seeds, their wild relatives and the role of the seeds in the cultures of the American Southwest and northwest Mexico. <u>They have a policy of providing FREE seeds to Native Americans.</u></p> <p>The <i>Seedhead News</i> back issues are resources for recipes and practical growing suggestions for edible plants. Their staff of</p>	<p>Native Seeds/SEARCH 526 N. 4th Ave. Tucson, AZ 85705 866-622-5561 Fax: 520-622-5591 www.nativeseeds.org Check the website for complete text issues of The <i>Seedhead News</i>.</p>

	volunteers answers questions, too.	
<p>Internet database of plants used as drugs, foods, dyes, fiber, ceremonial and other uses by natives Peoples of North America</p> <p><i>Native American Ethnobotany</i>, by Daniel Moerman, published by Timber Press, Portland, Oregon, 1998</p>  <p>Ellen Squiemphen of Confederated Tribes of Warm Springs picking huckleberries in Oregon, photo 1978</p>	<p>This site is most useful if one has a common name or the scientific name of a particular plant; when entered into the search window, a list of publications that document the use of the plant by native people will show a short summary and provide a link to the USDA data bank for plants. Pictures, range maps and endangered status can be found on that site.</p> <p>The information from the databank was published in the 1998 reference book. More than 4,000 species are included with extensive cross references. Several book reviews listed this as the single, most inclusive reference on the topic, but noted that other resources are needed for pictures; therefore the combination of the book and the website with links to the USDA plant data base are helpful; the book was the culmination of the author's lifetime of collecting this information</p>	<p>http://herb.umd.umich.edu/</p> <p>book still available in new or used conditions; price range is about \$40 - \$80; only in hardback edition</p>

Comprehensive educational program to recruit American Indian students preparing for health careers; has programs to support students from junior high school level and older.	Indians into Medicine (INMED) was established in 1973 to meet the need for health professionals serving American Indian reservation populations. As of 2005, the program had graduated 163 medical doctors and 317 Indian health professionals have gone through the program including nursing, clinical psychology and other specialties.	http://www.med.und.nodak.edu/depts/inmed/about.html INMED Program UNDSMHS Room 2101 501 N Columbia Road Stop 9037 Grand Forks, ND 58202-9037 Phone: 701-777-3037 Fax: 701-777-3277 Email: inmed@medicine.nodak.edu

Museums with American Indian Resources

RESOURCE	DESCRIPTION	WEBSITE/SOURCE
List of museums with American Indian resources, by state	There is a general list and a list by states; website quickly moves to commercial art posters, but each museum has a link from this site; most museum website arranged for teachers, not health providers	http://www.hanksville.org/NAresources/indices/NAmuseums.html
Smithsonian, National Museum of the American Indian	The national museum, on sites in Maryland, New York City, and Washington DC, which is dedicated to the preservation, study, and exhibition of the life, languages, literature, history, and arts of Native Americans.	www.AmericanIndian.si.edu ; list of printed and on-line resources, some related to agriculture and food; definitely organized for teachers and student visitors to the museum exhibits; some downloadable posters Three museums: George Gustav Heye Center, NY,

	Collaborates with Native peoples of Western Hemisphere to protect and foster cultures; not specific to topics related directly to health	NY; Cultural Resource Ctr in Suitland, MD and the National Museum of the American Indian (NMAI) on the National Mall, Fourth St. & Independence Ave, SW, Washington DC 20560 Phone: 202-633-1000

Partner Organizations for Promoting Fruits & Vegetables

Key Partners

National Congress of American Indians – from this site, contact any tribes through a listing by geographic area and a list by first name of tribe

http://www.ncai.org/Tribal_directory.3.0.html

Association of American Indian Physicians – provide a Facts-at-a-Glance Guide to a variety of statistics for AI/AN communities, and a CD and printable version of an extensive *AI/AN Diabetes Resource Guide for Health Professionals*

<http://www.aaip.org>

Indian Health Service Service Areas – contact any of the 12 service areas – <http://www.ihs.gov/>

Inter Tribal Councils – variety of sites; inter tribal councils may be the best contacts for fruit and vegetable promotions among smaller tribes

Arizona – www.itcaonline.com

Choctaw Nations of Oklahoma; Five Civilized Tribes – www.fivecivilizedtribes.org/

Michigan – www.itcmt.org

Nevada – www.itcn.org

California – www.itccinc.org

Alaska – www.aitc.org

Great Lakes – www.glitc.org

Vallejo - www.vallejointertribalcouncil.org

Environmental Concerns, especially water quality – www.itecmembers.org

National Health-Related Partners

Robert Wood Johnson Foundation (www.rwjf.org)

U.S.D.A. Summer Food Service Program (<http://www.ers.usda.gov/Briefing/ChildNutrition/summer.htm>)

Authors of this document

This “Resource and Tip Sheet” was developed and edited by a subcommittee on Special Populations of the SRC (State, Regional and Community Interest Group) of the National Fruit and Vegetable Alliance Steering Committee. Members of the subcommittee are:

Theresa Clay, Indian Health Service in Albuquerque Area

Kathy Cobb, Centers for Disease Control and Prevention

Lynn Hellenga, Montana State University

Jamie Hineman, Idaho Department of Health

Tempa Tate, New Mexico Department of Health

Laura Tanase, Centers for Disease Control and Prevention

Marie Tymrak, Arizona Department of Health Services - chairwoman

Melva Zerkoune, Inter Tribal Council of Arizona

Many people from a variety of agencies contributed and reviewed the document, which remains an evolving resource.
