

Don't Let the Bed Bugs Bite

#ITCAClimateChangeChallenge

Identifying Bed Bugs

Accurately identifying bed bugs is critical before treatment.
There are many bugs that look like bed bugs.

ADULT BED BUGS

- Size of a sunflower seed
- Long, brown, flat, oval body (if not fed recently)
- Balloon-like, red/brown, more elongated body (if fed recently)

Prevention

Focusing on preventing bed bugs is very beneficial.

PREVENTION TIPS

- Check all furniture that you purchase secondhand, like flea markets or yard sales, before bringing it home
- Make sure you have protective covers on your box springs and mattresses
- Keep the clutter in your home to a minimum
- Vacuum regularly and frequently
- Wash your bed sheets and blankets once per week
- Never pick up old mattresses
- When traveling, check the inseams of the bed before you unpack and lay down
- Use bed bugs traps

IF NECESSARY, CONTACT A

PEST CONTROL APPLICATOR

Signs of Bed Bugs

There are many different signs of bed bugs to be aware of.

SIGNS OF BED BUGS

- Stains on mattress with a rust or reddish color (caused by bed bugs being crushed)
- Dark spots on mattress – often look like pepper flakes (these are bed bug droppings)
- Pale/yellow eggs and eggshells (about 1mm)
- Bed bug bites that appear in a line or grouped together (usually on areas not covered by clothing)
- Live bed bugs

PLACES WHERE BED BUGS HIDE

- When bed bugs aren't feeding, they can be found hiding in a variety of places such as:
 - Around the bed
 - Near the piping or in the seams of the mattress
 - In the tags of the mattress or box spring
 - In cracks in the bedframe or headboard
 - In the seams of couches and chairs as well as in between cushions
 - In the folds of curtains
 - In drawer joints or electrical outlets
 - In/on items hanging on the walls
 - In luggage
 - On wicker furniture

TIP

Bed bugs can hide in cracks and crevices the width of a credit card!

Treatment

Treatment of bed bugs can take weeks to months.

BED BUG TREATMENT OPTIONS

- Before grabbing the spray can, try non-chemical treatment options such as:
 - Heat treatment – use a dryer on high heat, place your belongings in black plastic bags in a car under the sun, or refer to your Tribal government for prevention and treatment options
 - Steam treatment – the steam temperature must be at least 130°F but should not be forceful air or bed bugs might scatter. Steam can be used to treat carpets, baseboards, bed frames, and other furniture
